

# DESIGN YOUR OWN BIKE

Choose from high quality components combined with modern technology and classic design to create your own personal bike.

## You're connected, why shouldn't your bike be?

Technology impacts our lives in countless ways, yet we ride the same archaic bicycles to and from work every day. It's time to integrate the most influential technology into the bicycle.

Track your route with the built in GPS and view it live in any modern browser. Ideal for sharing your route with friends.

## Fully customizable

Just like the people who ride them, bikes come in all shapes and sizes. We decided to leave it up to you to decide how your bike will look. The only tools we offer are those to let your creativity go for a ride.

Design your own bike on our website. You pick, choose, swap and decide between different colors, wheels, saddles and accessories.
